Kenmore® Smart Water Heater Module PRODUCT FACTS

Product Overview:

The Kenmore® Smart Water Heater Module brings homeowners the reliability they've come to expect from the trusted Kenmore® brand and can help save energy, money and home headaches. Operated via the Kenmore® Smart app and used with the Module*, users can connect select new and existing Kenmore® and Kenmore Elite® Water Heaters** to monitor leak detection and control home water temperature and usage.

Why do I need a Kenmore® Smart Water Heater Module in my home?

Peace of mind

- Alerts on your smartphone or tablet and sounds audibly if a leak is detected, or if your water heater is not working properly.

Control on-the-go

- Remotely adjust your compatible Kenmore® and Kenmore Elite® water heater's temperature to start, stop and schedule production, providing you the flexibility and peace of mind to control your hot water consumption while away.

Energy savings

- Connected technology gives you the ability to adjust your compatible Kenmore® and Kenmore Elite® water heater to produce hot water when you have a need for it, saving energy and money on your utility bills.

Easy setup

- Available for iOS*** and Android™* devices, it's easy to link your Smart Water Heater Module by simply downloading the Kenmore® Smart app from the Apple Store®* or Google Play™* and following the step-by-step instructions to add your new Smart Water Heater Module.

Features:

- Leak Detection** helps prevent water damage and repair expenses with an app feature that alerts homeowners should an unexpected outpouring occur.
- Remote temperature adjustment** helps homeowners save money and energy by producing hot water only when desired.
- View available hot water** to take the cold surprise out of users' morning routines, monitoring how much water is left for a hot shower.
- Service appointment reminders** help eliminate the hassle of scheduling last-minute service appointments by receiving alerts when the water heater needs attention.
